

Airbag Protection

The Pro Shield is quickly installed to guard both patient and rescuer from un-discharged airbags. The Pro Shield's bag tearing studs shred the airbag on contact which rapidly disappates the hot gases that deploy the airbag.

- Quick and simple to install on steering wheel
- Suitable for all types of cars and trucks
- Reusable

Construction and Design

- Steel impact protection plate with bag tearing studs
- Installs quickly and securely

Easy Installation

- Hook the fixed retaining loop on the steering wheel (Black Handle)
- Secure the adjustable retaining loop on the steering wheel (Silver Handle), then release to lock in position

The vehicle's ignition and gear shifter can be used with the Pro Shield in place.
